## MADE IN RUSSIA!

Public Company "NPO "Digital Television Systems"  
(Gusev, Kaliningrad region)

### For telecommunication industry companies:

- Through-hole technology  
and surface mount technology  
(SMT&THT)
- Final assembly system

*The factory is equipped with two surface-mount technology (SMT) assembly lines with overall through-output up to 400 000 components per hour.*

- The pick and place SMT machine **Fuji NXT II** of the latest generation delivers even in the hardest tasks of mounting the surface-mountable components
- The automatic optic inspection system Orbotech and laser marking system **NUTEK** jointly control the accuracy of both the spreading of solder paste and actual components placement
- The production quality control system includes the incoming components control, the quality check during the production process and the control of output product quality

***The team.** We are big and flocky team never stuck in our current achievements. We learn and improve and elaborate our working environment.*

*We are responsible of the results. With ongoing analysis of the factory operation we're aware of required optimization measures and willingly introduce it whenever needed.*

### Through-hole technology and surface mount technology (SMT&THT)

We offer both the high speed fully automated SMT mounting and either automated or manual through-hole components mounting all satisfying the Third-class requirements of IPC-A-610D international standard.

- Lead-free technology
- PCB laser marking, 3D and X-ray inspection
- Our factory meets the requirements of international electro mechanics committee on static electricity

### Final assembly system

We offer the services of final assemblage of electronic equipment and consumer electronics devices along with testing and packing.

***Consideration on every customer.** We gently treat any customer request and try to find out the optimal solutions on whatever hard customers tasks. Every employee of our team is fully aware of his role in overall customer's satisfaction.*

We are winners of the Business Improvement award **"The Brand of Kaliningrad of 2008"** in the category **"The best innovation"**
